

## Sculpture Club at Home

**Sculpture Club** is a programme of free family-friendly creative workshops by Glasgow Sculpture Studios.

Sculpture Club sessions give children and their grown-ups the chance to be creative, spend time together, and to try new things. Led by experienced professional artists from Glasgow Sculpture Studios, each session is unique and a great introduction to new ways of thinking and making that you can continue at home and at your own pace.

We've been working on these **Sculpture Club at Home activity packs** as a way to keep making, sharing, and connecting while we're unable to run our usual weekly sessions at Glasgow Sculpture Studios and Woodside Library. We've been working with our friends at **Queen's Cross Housing Association** and **Home-Start Glasgow North** to make sure our activity packs reach families in our local community.

Follow the link below to find all of our previous Sculpture Club at Home activities or you can follow us on the @ **SculptureClubbing** Facebook page:

CREATURE PUPPETS

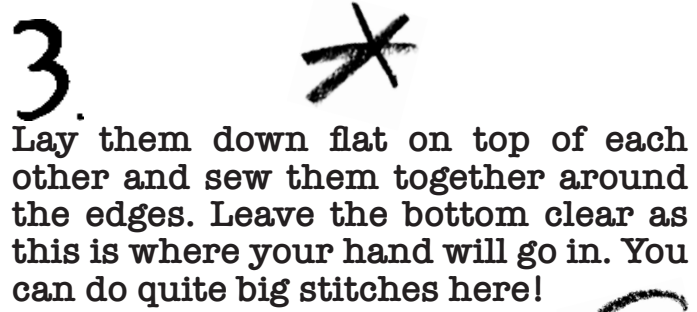

*Here's how you can make your own hand puppet that looks like a mythical creature!*

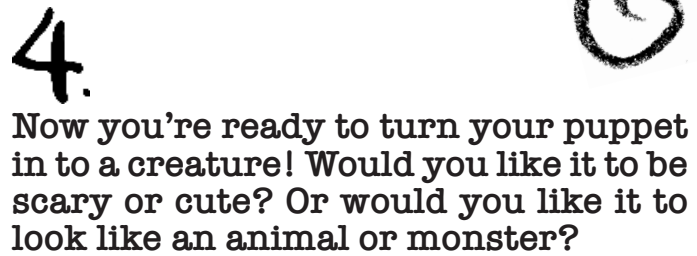

1. Lay your hand down flat on one of the sheets of felt with your fingers spread out. Draw around the shape of your hand and wrist, leaving about a 3cm gap. Don't go in between fingers. See the rough shape you should be aiming for below.

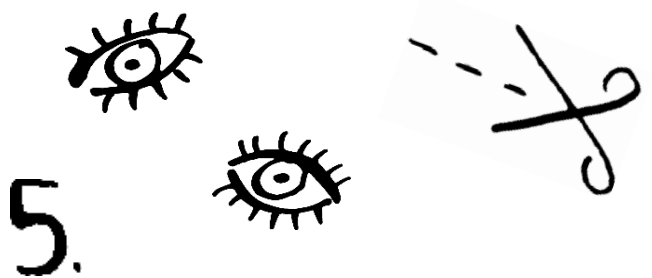

2. Cut out this shape and lay it on top of another piece of felt. Draw around it and then cut it out. You now should have two pieces that are the same.

3. Lay them down flat on top of each other and sew them together around the edges. Leave the bottom clear as this is where your hand will go in. You can do quite big stitches here!

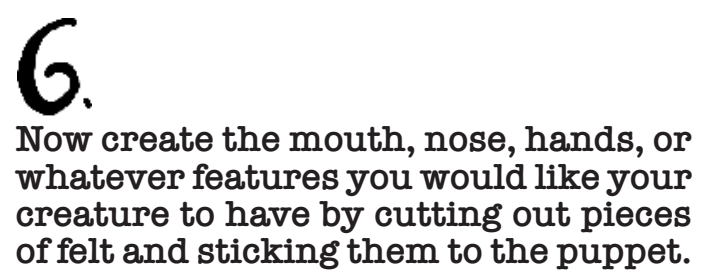

4. Now you're ready to turn your puppet in to a creature! Would you like it to be scary or cute? Or would you like it to look like an animal or monster?

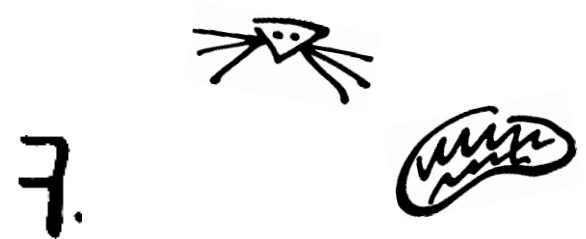

5. First cut out some eyes out of another colour felt, and then perhaps some pupils to stick on top? Use the glue stick to stick pieces together and to stick them to your puppet.

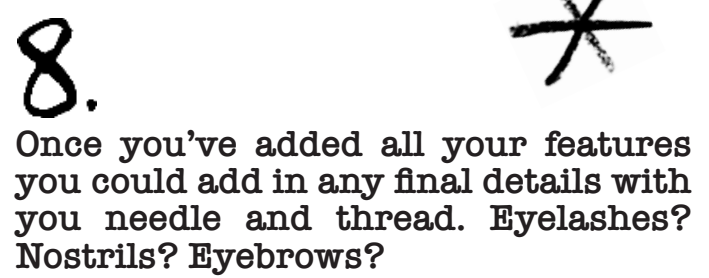

*Think about it being a bit like collaging with paper!*

6. Now create the mouth, nose, hands, or whatever features you would like your creature to have by cutting out pieces of felt and sticking them to the puppet.

7. You could even add some wool for the hair - you could do this by bunching it together and sewing it on.

8. Once you've added all your features you could add in any final details with your needle and thread. Eyelashes? Nostrils? Eyebrows?

*Now you're ready to play with your puppet!*
